Nature of work, conditions and outlook

Today's Construction Craft laborer is a person of many talents, able to work on a variety of construction and environmental projects. Physical ability plays a major role in this profession. Laborers' work runs the gamut from pick and shovel to computers and lasers. The ability to perform a variety of jobs on a single site is vital to success. A Laborers work is highly active and very strenuous. Laborers work in all weather and under all conditions, from underground to high in the air. The work is seasonal. Laborers may also be exposed to physically dangerous jobs and hazardous materials. Laborers are the first craft on the construction site and the last to be laid off. Advancing Trade Technology will mean that laborers with exceptional skills and training will always be in demand. The current shortages of skilled construction workers will guarantee work for the construction craft laborer with skills and ambition.

Entrance Requirements

AGE: Minimum 18 years.

Health: Must be physically capable of performing hard work.

Residency: Must be a resident of the State of Montana

Education: High school diploma or GED is required.
